Library & IT Services 2026–27

ODYSSEY INSTITUTE OF TECHNOLOGY (OIT)

Document No.: OIT/LIB-IT/2026-27/001
Issued by: Library and Information Technology Services
Academic Year: 2026–2027

Purpose and Scope

This document outlines the library facilities, book borrowing rules, late fines, computer laboratory locations, and IT service guidelines at Odyssey Institute of Technology (OIT). Students are expected to follow these instructions to ensure fair access to academic resources and the responsible use of institutional facilities.

1. Library Membership and Book Borrowing

The OIT Library provides students with access to textbooks, reference materials, academic journals, and other learning resources. Students must use their valid institute identity cards to borrow books and access designated library services.

Students can borrow 3 books for 14 days and renew once online.

Books should be returned or renewed within the permitted borrowing period. Students are responsible for keeping borrowed materials in good condition and returning them on time. Damaged, lost, or unreturned books may be subject to additional action under the applicable library policy.

Online renewals must be completed through the designated library system before the due date and are subject to the library's renewal rules.

2. Late Fines and Return Policy

The library applies late fines to encourage timely returns and ensure that resources remain available to all students.

The late fine is Rs 5 per day per book.

Students should check the due date displayed in the library system and return or renew borrowed materials promptly. Any discrepancy in a fine or borrowing record should be reported to the library staff with the relevant details.

Repeated failure to return books on time may result in temporary restrictions on borrowing privileges in accordance with institutional library regulations.

3. Computer Laboratories and Locations

OIT provides computer laboratories to support programming, practical coursework, research, project development, and other academic activities.

Computer Labs 1 and 2 are on the first floor of B-Block. Lab 3 is on the ground floor of C-Block. Labs are open 8 am to 8 pm.

Students must use the laboratories for authorized academic and educational purposes. They should follow the instructions of laboratory supervisors and comply with all safety, access, and equipment-use guidelines.

Laboratory computers, peripherals, and network facilities must be handled carefully. Students must not install unauthorized software, change system configurations without permission, or attempt to access restricted accounts or files.

4. IT Support and Technical Assistance

The Information Technology Services team supports institutional computing facilities, approved software, network access, and general technical issues related to academic work.

Students experiencing technical problems should report them to the designated IT support staff, providing a clear description of the issue and the laboratory or device involved.

Students must protect their login credentials and avoid sharing passwords. Unauthorized access, software piracy, deliberate system disruption, and misuse of institutional networks are prohibited and may result in disciplinary action.

5. Student Responsibilities and Conduct

All students are expected to maintain a quiet and respectful environment in the library and computer laboratories. Food, drinks, and disruptive activities may be restricted in designated areas to protect resources and support other users.

Students must keep study areas clean, return books to the appropriate location or return desk, and leave computer workstations orderly after use.

Personal belongings should not be left unattended. Any loss, damage, safety concern, or technical fault should be reported promptly to the relevant staff member.

6. Enquiries and Administrative Support

For questions about borrowing records, renewals, overdue fines, or library resources, students should contact the Library Services Desk.

For computer laboratory access, equipment faults, or technical assistance, students should contact the IT Services team during the applicable service hours.

Students should provide their name, enrolment number, and a brief description of their enquiry to help staff resolve requests efficiently.

7. Compliance and Important Notice

All students are responsible for reading and following the library and IT service rules outlined in this document. The institute may issue additional instructions when necessary to maintain the security, availability, and effective operation of its facilities.

These guidelines apply to the academic year 2026–2027 and are subject to authorized updates communicated through official OIT notices.
